VOL. 23 1976

SUBJECT INDEX

- acid-base. A peroperative study of the — status before and after arterial clamping on patients with intermittent claudication ... 303
- Acrodermatitis. — enteropathica treated with oral zinc sulphate 207
- acute leukemia. Cytokinetics and chemotherapy of human — 257
- acute leukaemia. Fibrinolysis and antithrombin in — 81
- acute myocardial infarction. Cardiac rupture after — 235
- acute myocardial infarction. Long-term prognosis after —, with special reference to the long-term survival, the risks of re-infarction and cardiac arrest 238
- acute myocardial infarction. Maximum enzyme values in — according to age, sex and different sites of infarction 165
- adrenocorticotrophic. Isolated — hormone deficiency: A case report 45
- anabolic. Treatment of cystinosis by a cystine- and methionine-poor diet plus — steroid: Treatment of two children and survey of previous treatment results 210
- antithrombin. Fibrinolysis and — in acute leukaemia 81
- arterial. A peroperative study of the acid-base status before and after — clamping on patients with intermittent claudication ... 303
- aspiration. Long-term results of ultrasonically guided percutaneous — of renal cysts 161
- aspiration biopsy. Clinical value of —. Fine-needle puncture in a consecutive material of 107 patients with neck tumours 251
- azathioprine. Assessment of the effect of — on human bone marrow cells in vivo, combining chromosome studies and the micronucleus test 152
- B-, T- and O-Lymphocytes. — in patients with CLL and splenomegaly before and after splenectomy 205
- Bacteriuria. — in elderly women 200
- bacteriuria. Urinary bladder dysfunction in relation to — 288
- basal region. Moyamoya disease: Bilateral occlusion of the carotid artery associated with abnormal vascular network in the — of the brain 41
- bile. Abnormal — acid metabolism in rheumatoid arthritis. Preliminary communication 95
- bile acid. Abnormal — metabolism in rheumatoid arthritis. Preliminary communication 95
- Bilirubins. — in human serum 51
- bladder dysfunction. A clinical study of the frequency of — in diabetics 268
- bladder dysfunction. Urinary — in relation to bacteriuria 288
- blood. Testing of feces for occult —: A review 230
- Body plethysmography. Some historical aspects of — 193
- Bone marrow. Assessment of the effect of azathioprine on human — cells in vivo, combining chromosome studies and the micronucleus test 152
- brain. Moyamoya disease: Bilateral occlusion of the carotid artery associated with abnormal vascular network in the basal region of the — 41
- calcium. Effect of thiazide diuretics upon — metabolism 223
- calcium. The influence of fasting and venous stasis on the serum values of —, magnesium and protein 198
- calcium metabolism. Effect of thiazide diuretics upon — 223
- carcinoma. Anaplastic thyroid — in Denmark 1943-1968 120
- carcinoma. Follicular thyroid — in Denmark 1943-1968 107
- Cardiac. — rupture after acute myocardial infarction 235
- cardiac arrest. Long-term prognosis after acute myocardial infarction, with special reference to the long-term survival, the risks of re-infarction and — 238
- Cardiac rupture. — after acute myocardial infarction 235
- carotid artery. Moyamoya disease: Bilateral occlusion of the — associated with abnormal vascular network in the basal region of the brain 41
- Cervical. — carcinoma in Frederiksberg borough: The influence of population screening on incidence and stage distribution of invasive cases 86

Cervical. — carcinoma in Frederiksberg borough: The influence of population screening on mortality	296	Cytokinetics. — and chemotherapy of human acute leukemia	257
Cervical carcinoma. — in Frederiksberg borough: The influence of population screening on incidence and stage distribution of invasive cases	86	Cytomegalovirus. — infection as cause of fever of general medical patients	99
Cervical carcinoma. — in Frederiksberg borough: The influence of population screening on mortality	296	Danish pathologist. Great — and discoverer of endotoxin	143
chemotherapy. Cytokinetics and — of human acute leukemia	257	diabetic. Relationship to some late — manifestations	280
chromosome studies. Assessment of the effect of azathioprine on human bone marrow cells in vivo, combining — and the micro-nucleus test	152	Diabetic cystopathy. I: A clinical study of the frequency of bladder dysfunction in diabetics	268
chronic hemodialysis. Blood glucose levels in patients on — during propranolol treatment	205	Diabetic cystopathy. II: Relationship to some late-diabetic manifestations	280
CLL. B-, T- and O-lymphocytes in patients with — and splenomegaly before and after splenectomy	205	Diabetic cystopathy. III. Urinary bladder dysfunction in relation to bacteriuria	288
clamping. A peroperative study of the acid-base status before and after arterial — on patients with intermittent claudication ...	303	Diabetic cystopathy. IV: Micturition cystourethrography compared with urodynamic investigation	292
claudication. A peroperative study of the acid-base status before and after arterial clamping on patients with intermittent	303	diabetics. A clinical study of the frequency of bladder dysfunction in —	268
Congenitally. — corrected transposition: A detailed review of the world literature	168	dialysis. Regular — treatment in older age groups	205
congenitally. Four cases of — corrected transposition with associated defects	184	dialysis. Renal transplanation and regular — treatment of infants and children	72
Congenitally corrected transposition. —: A detailed review of the world literature	168	Discitis. Postoperative —	101
congenitally corrected transposition. Four cases of — with associated defects	184	diuretics. Effect of thiazide — upon calcium metabolism	223
contrast media. Intravenous urography in the diagnosis of renovascular hypertension: With special reference to kidney size changes following intravenous administration of water-soluble — and diuretics	12	diuretics. Intravenous urography in the diagnosis of renovascular hypertension: With special reference to kidney size changes following intravenous administration of water-soluble contrast media and —	12
coronary. Problems in evaluation of — care units	163	duodenal ulcer. A comparison of the course of the disease among patients with gastric ulcer, —, and ulcer dyspepsia without ulcer demonstrable by X-ray	129
coronary care units. Problems in evaluation of coronary regime. Acute myocardial infarction: The necessity of long-term monitoring, the missing necessity of the —	254	duodenum. The motor-stimulation effect of rectally administered metoclopramide on the human —	301
cystic fibrosis. Immunochemical quantitation of 18 proteins in sera from patients with —: Concentrations correlated to class of fibroblast metachromasia, clinical and radiological lung symptoms	155	dyspepsia. A comparison of the course of the disease among patients with gastric ulcer, duodenal ulcer, and ulcer — without ulcer demonstrable by X-ray	129
cystine-poor. Treatment of cystinosis by a — and methionine-poor diet plus anabolic steroid: Treatment of two children and survey of previous treatment results	210	endotoxin. Great Danish pathologist and discoverer of —	143
cystinosis. Infantile nephropatic — in Denmark	216	enteropathica. Acrodermatitis — treated with oral zinc sulphate	207
cystinosis. Treatment of — by a cystine- and methionine-poor diet plus anabolic steroid: Treatment of two children and survey of previous treatment results	210	environmental. Occurrence of peptic ulcer disease in Copenhagen males age 40-59: Life incidence and one-year incidence correlated to — factors, life habits, physical factors, and concomitant disease	23
cystourethrography. Micturition — compared with urodynamic investigation	292	feces. Testing of — for occult blood: A review	230
cysts. Long-term results of ultrasonically guided percutaneous aspiration of renal —	161	Fibrinolysis. — and antithrombin in acute leukaemia	81
		fibroblast. Immunochemical quantitation of 18 proteins in sera from patients with cystic fibrosis: Concentrations correlated to class of — metachromasia, clinical and radiological lung symptoms	155
		Fine-needle puncture. Clinical value of aspiration biopsy. — in a consecutive material of 107 patients with neck tumours	251
		Foeto-maternal. — Bleeding	77

gamma camera. Computer-assisted — radioangiography of the brain	101	late-diabetic. Relationship to some — manifestations	280
Gamma camera. — renography with ^{99m} Tc-DTPA	101	leukaemia. Cytokinetics and chemotherapy of human acute —	257
gastric ulcer. A comparison of the course of the disease among patients with —, duodenal ulcer, and ulcer dyspepsia without ulcer demonstrable by X-ray	129	leukaemia. Fibrinolysis and antithrombin in acute —	81
glucose. Blood — levels in patients on chronic hemodialysis during propranolol treatment	205	long-term monitoring. Acute myocardial infarction: The necessity of —, the missing necessity of the coronary regime	254
hemodialysis. Blood glucose levels in patients on chronic — during propranolol treatment	205	Macrophage-lymphocyte. — interaction during immune response in vitro	101
hormone deficiency. Isolated adrenocorticotrophic —: A case report	45	magnesium. The influence of fasting and venous stasis on the serum values of calcium, — and protein	198
hypertension. Intravenous urography in the diagnosis of renovascular —: with special reference to kidney size changes following intravenous administration of water-soluble contrast media and diuretics	12	meatal. The urethral pressure profile in female patients with — stenosis	161
immune response. Macrophage-lymphocyte interaction during — in vitro	101	meatal stenosis. The urethral pressure profile in female patients with —	161
Immunochemical. — quantitation of 18 proteins in sera from patients with cystic fibrosis: Concentrations correlated to class of fibroblast metachromasia, clinical and radiological lung symptoms	155	metachromasia. Immunochemical quantitation of 18 proteins in sera from patients with cystic fibrosis: Concentrations correlated to class of fibroblast —, clinical and radiological lung symptoms	155
incidence. Occurrence of peptic ulcer disease in Copenhagen males age 40-59: Life — and one-year incidence correlated to environmental factors, life habits, physical factors, and concomitant disease	23	methionine-poor. Treatment of cystinosis by a cystine- and — diet plus anabolic steroid: treatment of two children and survey of previous treatment results	210
Incidence. Prodomata in patients with acute myocardial infarction. — and clinical significance	34	metoclopramide. The motor-stimulation effect of rectally administered — on the human duodenum	301
Infantile. — nephropatic cystinosis in Denmark	216	micronucleus. Assessment of the effect of azathioprine on human bone marrow cells in vivo, combining chromosome studies and the — test	152
infarction. Acute myocardial —: the necessity of long-term monitoring, the missing necessity of the coronary regime	254	Micturition. — cystourethrography compared with urodynamic investigation	292
infarction. Cardiac rupture after acute myocardial —	235	mortality. Cervical carcinoma in Frederiksberg borough: The influence of population screening on —	296
infarction. Long-term prognosis after acute myocardial —, with special reference to the long-term survival, the risks of re-infarction and cardiac arrest	238	motility. Small intestinal —: Clinical recording of electrical spike potentials and intraluminal pressure variations	5
infarction. Maximum enzyme values in acute myocardial — according to age, sex and different sites of infarction	165	motor-stimulation. The — effect of rectally administered metoclopramide on the human duodenum	301
infarction. Prodomata in patients with acute myocardial —. Incidence and clinical significance	34	Moyamoya disease. —: bilateral occlusion of the carotid artery associated with abnormal vascular network in the basal region of the brain	41
intestinal. Small — motility: Clinical recording of electrical spike potentials and intraluminal pressure variations	5	myocardial. Acute — infarction: The necessity of long-term monitoring, the missing necessity of the coronary regime	254
intraluminal pressure. Small intestinal motility: Clinical recording of electrical spike potentials and — variations	5	myocardial. Cardiac rupture after acute — infarction	235
kidney size. Intravenous urography in the diagnosis of renovascular hypertension: with special reference to — changes following intravenous administration of water-soluble contrast media and diuretics	12	myocardial. Long-term prognosis after acute — infarction, with special reference to the long-term survival, the risks of re-infarction and cardiac arrest	238
		myocardial. Maximum enzyme values in acute — infarction according to age, sex and different sites of infarction	165
		myocardial. Prodomata in patients with acute — infarction. — Incidence and clinical significance	34

neck tumours. Clinical value of aspiration biopsy. Fine-needle puncture in consecutive material of 107 patients with —	251	renal. Long-term results of ultrasonically guided percutaneous aspiration of — cysts ..	161
nephropatic. Infantile — cystinosis in Denmark	216	Renal. — transplanation and regular dialysis treatment of infants and children	72
nystagmus. Duration of the fast phase in optokinetic —	161	Renal transplanation. — and regular dialysis treatment of infants and children	72
nystagmus. Optimum target speed in optokinetic — and significance of width of targets	161	renography. Gamma camera — with ^{99m} Tc-DTPA	101
occult blood. Testing of feces for —: a review optokinetic. Duration of the fast phase in — nystagmus	230	renovascular. Intravenous urography in the diagnosis of — hypertension: With special reference to kidney size changes following intravenous administration of water soluble contrast media and diuretics	12
optokinetic. Optimum target speed in — nystagmus and significance of width of targets	161	rheumatoid arthritis. Abnormal bile acid metabolism —. Preliminary communication	95
oxygen. Transcutaneous — tension measurement	303	Sarcoma. — of the thyroid gland: Twenty-two cases in Denmark 1943-1968	103
oxygen tension. Transcutaneous — measurement	303	Spike potentials. Small intestinal motility: Clinical recording of electrical — and intraluminal pressure variations	5
peptic ulcer. Longevity and causes of death of — patients	136	splenectomy. B-, T- and O-lymphocytes in patients with CLL and splenomegaly before and after —	205
peptic ulcer. Occurrence of — disease in Copenhagen males age 40-59: life incidence and one-year incidence correlated to environmental factors, life habits, physical factors, and concomitant disease	23	splenectomy. Results and complications following — in patients with haematological diseases and considerable splenomegaly ..	205
percutaneous. Long-term results of ultrasonically guided — aspiration of renal cysts ..	161	splenomegaly. B-, T- and O-lymphocytes in patients with CLL and — before and after splenectomy	205
peroperative. A — study of the acid-base status before and after arterial clamping on patients with intermittent claudication ...	303	splenomegaly. Results and complications following splenectomy in patients with haematological diseases and considerable —	205
platelet. Diagnostic usefulness of a newly described method for the quantitative determination of — aggregates in cases of deep venous thrombosis	249	stenosis. The urethral pressure profile in female patients with meatal —	161
platelet aggregates. Diagnostic usefulness of a newly described method for the quantitative determination of — in cases of deep venous thrombosis	249	steroid. Treatment of cystinosis by a cystine- and methionine-poor diet plus anabolic —: Treatment of two children and survey of previous treatment results	210
population screening. Cervical carcinoma in Frederiksberg borough: The influence of — on incidence and stage distribution of invasive cases	86	sudden unexpected deaths. Epidemiology of — in Denmark	28
population screening. Cervical carcinoma in Frederiksberg borough: The influence of — on mortality	296	survival. Long-term prognosis after acute myocardial infarction, with special reference to the long-term —, the risks of re-infarction and cardiac arrest	238
pressure profile. The urethral — in female patients with meatal stenosis	161	thiazide. Effect of — diuretics upon calcium metabolism	223
propranolol. Blood glucose levels in patients on chronic haemodialysis during — treatment	205	Thrombocytopenia. — in infancy: An evaluation of 53 patients	245
protein. The influence of fasting and venous stasis on the serum values of calcium, magnesium and —	198	thrombosis. Diagnostic usefulness of a newly described method for the quantitative determination of platelet aggregates in cases of deep venous —	249
radioangiography. Computer-assisted gamma camera — of the brain	101	thyroid. Anaplastic — carcinoma in Denmark 1943-1968	120
radiological. Immunochemical quantitation of 18 proteins in sera from patients with cystic fibrosis: Concentrations correlated to class of fibroblast metachromasia, clinical and — lung symptoms	155	thyroid. Follicular — carcinoma in Denmark 1943-1968	107
re-infarction. Long-term prognosis after acute myocardial infarction, with special reference to the long-term survival, the risks of — and cardiac arrest	238	thyroid. Sarcoma of the — gland: Twenty-two cases in Denmark 1943-1968	103
		Transcutaneous. — oxygen tension measurement	303
		transplanation. Renal — and regular dialysis treatment of infants and children	72
		transposition. Congenitally corrected —: A detailed review of the world literature	168

transposition. Four cases of congenitally corrected — with associated defects	184	venous. Diagnostic usefulness of a newly described method for the quantitative determination of platelet aggregates in cases of deep — thrombosis	249
ultrasonically. Long-term results of — guided percutaneous aspiration of renal cysts	161	water- and CO ₂ -cystometry. A comparative study of —	254
urethral. The — pressure profile in female patients with meatal stenosis	161	water-soluble. Intravenous urography in the diagnosis of renovascular hypertension: With special reference to kidney size changes following intravenous administration of — contrast media and diuretics ...	12
Urinary. — bladder dysfunction in relation to bacteriuria	288	zinc. Acrodermatitis enteropathica treated with oral — sulphate	207
urodynamic. Micturition cystourethrography compared with — investigation	292	zinc. The biological role of — in normal and pathological conditions: A survey	146
urography. Intravenous — in the diagnosis of renovascular hypertension: With special reference to kidney size changes following intravenous administration of water-soluble contrast media and diuretics	12	zinc sulphate. Acrodermatitis enteropathica treated with oral —	207
vascular. Moyamoya disease: Bilateral occlusion of the carotid artery associated with abnormal — network in the basal region of the brain	41
